

IPA (IKEA Print Application) Release notes

Version 2024.08.14 (Release date: 28.9.2024)

1. Updated ULL – Print application

New feature **Show all DWP data** is available: Products can have different DWP Number and DWP Edition data in database. By default version with highest combination is shown. When you enable this option you can see all other DWP No and DWP Ed values for all products.

The screenshot shows the ULL - Print application interface. At the top, there is an IKEA logo and the title "ULL - Print". Below the header, there are controls for "LABEL TEMPLATE" (radio buttons for ULL 105.nlbl, ULL 105 v1.nlbl, ULL 148.nlbl, ULL 148 v1.nlbl, ULL 148 v2.nlbl, ULL 148 v3.nlbl), "DATE" (25.9.2024), "WEEK" (39), and "LABEL PRINT PREVIEW". A search bar is present with a "Search" button and a checkbox for "Show All DWP Data". Below the search bar is a table with columns: Item, Description, Item/Pal, and Weight. The table lists various items like MARIUS stool, NESTTUN head+footb, HAMMARN sb Knisa, VANGSTA ext tbl, SAGSTUA head+footb, FYRESDAL N day-bed, KLEPPSTAD bed, and VEVELSTAD bed. At the bottom, there is a "PRINTER" dropdown set to "Microsoft Print to PDF" and a "Print" button. The bottom status bar shows "Computer Name:", "User Name:", "Program version: v2024.08.14 / 21.3.0.10814", and "PROD Environment".

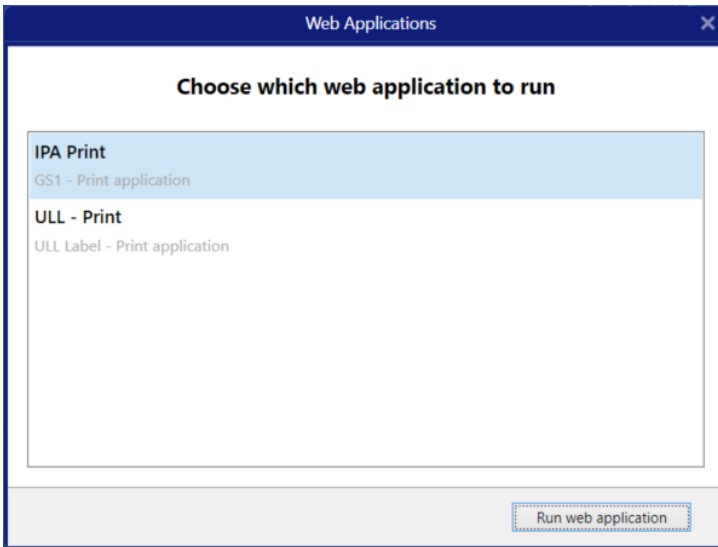

Item	Description	Item/Pal	Weight
00162380	MARIUS stool 45 black AP JP	156	259

Version 2024.06.05 (Release date: 8.6.2024)

2. Deployment of ULL – Print application

Supplier is able to select ULL – Print application (if assigned):

1. IPA – Print for printing Product identification labels
2. ULL – Print for printing Pallet labels

3. Check if NOTO IKEA fonts are installed

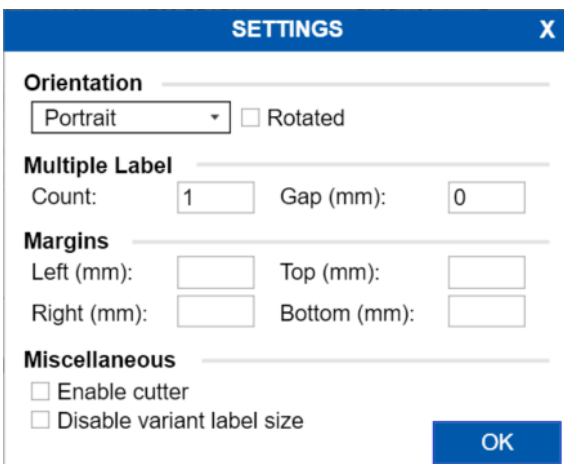

During application start procedure system will check if required NOTO IKEA fonts are installed on your PC:

- NotoIKEAKorean-Bold.ttf
- NotoIKEAKorean-Regular.ttf
- NotoIKEALatin-Bold.ttf
- NotoIKEALatin-BoldItalic.ttf
- NotoIKEALatin-Italic.ttf
- NotoIKEALatin-Regular.ttf

If fonts are not installed the Information pop-up message will notify you that missing fonts will be downloaded from Control Center document storage.

4. Label settings new feature

Rotate feature enables rotation of the label for 180 degrees.

5. New feature Notifications

On right side of IPA web printing application first Menu screen there's new Notification message(s) displayed about planned updates, maintenance downtime,.. (if active).

1. IPA deployment in APAC datacentre

To enable better performance for suppliers in APAC region, IPA application solution was deployed to APAC datacentre.

Suppliers could now launch IPA application from 2 datacentres:

- <https://IKEA.onnicelabel.com> (Datacentre in Europe recommended for suppliers located in Europe) or
- <https://IKEA-AP.onnicelabel.com> (Datacentre in APAC recommended for suppliers located in Asia-Pacific)

2. Unlimited quantity to support label store and recall

Unlimited checkbox was added to IPA application. Enabling this option will send unlimited number of labels to the printer. That functionality is usually used for marking printers (label store and recall).

The screenshot shows the 'LABEL PRINT' interface. At the top, there are search filters for Supplier, Item Name, Label Type (CP, MP, PI), and SIR State (Implemented, Accepted, Review, Rel to Sup). Below the filters is a table with columns: CPN, Item No., Item Name, Label Name, Doc. Name, Application method, and State. The table lists several items, including 'TUFJORD upholst bed frm 140x200 Gunnared blue'. Below the table are settings for Prefix, Date (01.03.2024), Suffix, Data Matrix (Square), Product information (Complete label), Color dot (Show color dot with number), Number (Show number), and Preview mode (Overlay). A 'Label Preview' section shows a detailed view of a label for 'TUFJORD' with a barcode, QR code, and various technical details. At the bottom, there is a 'Select Printer' dropdown (ZEBRA ZT421-300dpi ZPL), a 'Print Quantity' field (1), and an 'Unlimited' checkbox which is highlighted with a red box. A 'Print' button is also visible.

CPN	Item No.	Item Name	Label Name	Doc. Name	Application method	State
1	00438275	VINLIDEN 2-seat sec GB	1R35-IDADM,NUA	PI-448997-1	Adhesive or Printed	Implemented

1. Deployment of Merged label feature

Merged labels functionality enables supplier to print Identification label with additional LCI information as merged label.

If Merged label functionality is enabled for supplier, additional button Label mapping is available in IPA print application. Click on Label mapping opens pop-up window where mapping could be performed for selected Item/Identification label.

The screenshot shows the 'Label Print' application interface. At the top, there is a blue header with 'LABEL PRINT' and the IKEA logo. Below the header, there are search filters for Supplier, Item Name, Label Type, and SIR State. A table lists items with columns for CPN, Item No., Item Name, Label Name, Doc. Name, Application method, and State. Below the table, there are additional filters for Prefix, Date, Suffix, Data Matrix, Product information, Color dot, Number, and Preview mode. A 'Label Preview' section shows a sample label for 'LÅNGARYD' with a 'Label mapping' button highlighted in a red box. At the bottom, there are printer selection options, a 'Print' button, and system information.

CPN	Item No.	Item Name	Label Name	Doc. Name	Application method	State

2	00509753	LÅNGARYD frm so3 Djuparp dark blue AP	1R10-COA,IDADM,NUA	PI-131313-1	Sewn on	Implemented

Supplier could request Merged label functionality by opening service request at IKEA on [IKEA ServiceNow](#) portal.

1. New sections/

a) **Product information.** If product information sections are enabled on the label then you could select from dropdown menu which section(s) of the label will be printed.

Product information:

Complete label
Complete label
Only static information
Only data matrix and date

Complete label option will print complete label

Prefix: Date: Suffix: Data Matrix: Product information: Color dot: Number: Preview mode:
07.09.2023 Square Complete label Show colour dot with number Show number Overlay

Label Preview:

Only static information will print only static part of the label (**without** Datamatrix and production date)

Prefix: Date: Suffix: Data Matrix: Product information: Color dot: Number: Preview mode:
07.09.2023 Square Only static information Show colour dot with number Show number Overlay

Label Preview:

Only data matrix and date will print just dynamic part of the label

Prefix: Date: Suffix: Data Matrix: Product information: Color dot: Number: Preview mode:
07.09.2023 Square Only data matrix and date Show colour dot with number Show number Overlay

Label Preview:

b) **Color dot.** For labels with Color dot you could made a selection which part of Color dot to be printed

Color dot:

Show colour dot with number ▾
 Show colour dot with number
 Show colour dot
 Hide colour dot

Show color dot with number is showing circle and colour number

Prefix: Date: Suffix: Data Matrix: Product information: Color dot: Number: Preview mode:
